Aaron Woods

AWS DevOps Engineer

awoods134@gmail.com • (843) 356-7450
www.linkedin.com/in/aaronwoods134/
Alpharetta, GA 30022

Technical Proficiencies

Languages:	Python, PowerShell, Bash
Repositories:	GitLab, GitHub
Operating Systems:	Windows, Linux(CentOS, Red Hat)
Containers & Orchestration:	Docker, Kubernetes
Monitoring & Logging:	Sumo Logic, Grafana, PagerDuty, Splunk, LogicMonitor, Nagios
3rd Party Tools:	MongoDB, Gitlab Pipelines, Qualys, Terraform, Chef, Jenkins, Jira, Confluence, ServiceNow, CloudCheckr, Cloud Protection Manager
AWS/GovCloud Services:	Bedrock, Amazon Q, EC2, EKS, ECS, ELB, EBS, VPC, IAM, RDS, S3, SQS, SNS, Systems Manager, Lambda, API Gateway, Config, CloudFormation, CloudWatch, CodeDeploy

Professional Experience

Infor Inc, Atlanta, GA, March 2021- Present

DevOps Engineer **March 2021 – Present**

- Engineered autonomous AI agent skill in Kiro (Amazon Bedrock-powered) to audit 1,500+ servers; automated Qualys compliance checks with Python-driven self-healing—reduced remediation time/effort by 74%.
- Improved environmental security compliance by 80% through automated vulnerability identification and remediation using Qualys, further enhanced by implementing new GitLab pipeline scripts.
- Directed and maintained Sumo Logic dashboards and alerts, contributing to a 40% reduction in critical application incidents through continuous monitoring enhancements.
- Integrated a script into Jenkins jobs, increasing smoke and inspection test success rates for new releases by 70%.
- Strengthened application uptime by 90% by creating an automated service check to replace Nagios.
- Coordinated with the team to implement a Sumo Logic ingestion partition, resulting in a 90% monthly cost savings.
- Implemented scripts using Chef and Jenkins to automate Sumo Logic deployment to all 19 environments.
- Developed 9 automation tools in PowerShell and Bash that streamlined infrastructure provisioning across multiple environments, reducing manual deployment effort by 80%.
- Administered monthly release runbooks, incorporating new features and Chef configuration changes.

iVision Inc, Atlanta, GA, March 2016- March 2021

Cloud Engineer **August 2019 – March 2021**

- Reduced EC2, ELB, EBS, S3, and Operations expenditures by 40% on average, which lowered operational overhead.
- Supplied status report activity for team leads which led to a 30% increase in ticket turnover rate.
- Accelerated productivity by 70% by integrating automation into environments by implementing AWS Systems Manager.
- Administered AWS operations for clients and opened sales opportunities for the cloud practice, increasing sales by 30%.
- Conducted PMI/PMCS monthly, quarterly, and yearly, enabling continuous environmental improvement.
- Spearheaded security management, network, data, and application security solutions, increasing compliance by 80%.
- Strengthened 4 cloud capacity management/optimization techniques while reducing AWS maintenance costs to improve scalability.

Associate Cloud Consultant, **November 2018 - August 2019**

- Produced, streamlined, and executed Backup, Recovery, and Business Continuity processes, increasing savings by 70%.
- Applied the guidelines of the AWS Well architecture Framework for 60% of the client environments.
- Deployed, facilitated, and operated specialized, scalable, fault-tolerant systems on AWS for 30% of clients.

- Prepared deployment of desktop migrations for over 800 Users, increasing implementation time by 40%.
- Achieved a successful data center migration by completing full server and network migration within 22 hours.

System Analyst III, **March 2016 - November 2018**

- Designed instances, managed snapshots, user creation via IAM/ user permissions, enabled MFA on user accounts, S3 lifecycle/EC2 backup management, and provisioned elastic load balancer rules to alert healthy/unhealthy hosts.
- Monitored threshold breaches on client systems, identified/analyzed system trends, and remediated 70% of interruptions on environments utilizing NetApp, VMware, Amazon Web Services, and Cisco.
- Captured and documented over 40+ weekly incidents, problems, change requests, and service requests with accurate ticket information by utilizing the Momentum Engineering Global Service Center Guide processes.
- Conducted O365/Windows 10 Migrations and oversaw production patch management verification while adhering to ITIL best practices.

EnPro Industries, Lawrenceville, GA, July 2015 - March 2016

System Administrator II

- Resolved 1st and 2nd tier technical problems, cultivating user satisfaction and productivity.
- Served as a knowledge expert, assessing current procedures and processes for accomplishing department objectives and continuously developed and defined improved practices by creating 80% of support knowledge.
- Achieved resolution to long-term Issues with clients' Java applications, lowering tickets by 70%.

Education

Bachelor of Science in Electronic Engineering Technology, 2015

DeVry University

Credentials

AWS Certified Solutions Architect – Associate
AWS Certified Developer - Associate
AWS Certified Cloud Practitioner
Certified Six Sigma Black Belt - (CSSBB)
ITIL Foundation Certification
LogicMonitor Associate Certified Associate
Sumo Logic Certified Fundamentals
